

# Create Quote and Billing on Salesforce instantly!

Quote / Billing Option is an AppExchange application that can be used by installing in "Sales Cloud / Service Cloud". Quote / Billing Option offers useful functions to manage quotation and billing statement. For instance, this application is structured to administer the system from quotation to billing as a package, therefore no matter which department or responsible individual need to output the document, there will not be any duplicated unnecessary work involved.

Moreover, this optional service can be integrated with "OPROARTS Live for Force.com" and "OPROARTS Prime for Force.com" for effortless output. Utilizing Internet Fax Service is another method to deliver output document via fax by one click or why not trying 'Posting' service?

#### Multiple Quote / Billing information to one opportunity !!
